HARD SKILLS

- Proficient in JavaScript (ReactJS, Next.js, NestJS) and TypeScript.

- Skilled in backend development with PostgreSQL and API/microservices architecture.

- Knowledgeable in cloud platforms: AWS, Google Cloud, IBM Cloud.

- Expertise in Git workflows, Agile methodology, and technical strategy.

- Skilled in integrating third-party APIs, such as Open AI and Elevenlabs, to enhance application functionality.

SOFT SKILLS

- Strong communication skills for effective collaboration and stakeholder engagement.

- Proven leadership in team building, mentoring, and fostering productive environments.

- Quick learner with the ability to adapt to new technologies and workflows.

- Expertise in process improvement to optimize efficiency and outcomes.

- Exceptional attention to detail, ensuring quality and precision in deliverables.

WORK EXPERIENCE

Lead Engineer @ Lapzo 2022 - 2024

- Defined technical strategy and set standards for frontend and backend development.
- Mentored 10+ junior developers, reviewed code, and ensured best practices across 3 teams.
- Lead the development of 3+ NestJS microservices, 3+ application modules and 1 API.
- Managed stakeholder requirements across 5 functional areas, ensuring alignment with business goals and technical feasibility.

Javascript Developer @ Lapzo 2021 - 2022

- Developed and maintained a scalable front-end with 30+ reusable components using ReactJS, TypeScript, GraphQL, and Atomic Design, powering multiple user-facing features across 5+ modules.
- Helped build and mantain 5+ NestJS microservices supporting thousands of requests daily with consistent uptime and performance.
- Managed Git workflows, improving deployment times by 30 % using CI/CD pipelines.

Freelance 2020

- Software consulting with a focus on full-stack development in NextJs.
- Built React applications and components for 8+ clients.
- Managed cloud developments on AWS and Google Cloud.

Test Engineer @ Contpaqi 2019 - 2020

- Gathered business requirements and created test plans.
- Performed manual testing and developed automation scripts.

Javascript Developer @ IBM 2018 - 2019

- Developed with JavaScript (MERN stack) and built chatbots.
- Handled quality assurance using Selenium, Mocha/Chai, and Python.
- Led cloud projects on IBM Cloud with Agile methodology.
